Fortitude

Fortitude is defined as courage in pain or adversity and courage can be defined as action despite of fear. There used to be a trend of calling those who followed chiropractic philosophy as a "principled" chiropractor. This term has fallen out of favor for many reasons and some of them are good. My point is this. In this profession and in this world today, there seems to be a move away from principle and truth and even reality. So, when someone comes

along who is sure of what they are doing and why they are doing it and espousing the level of truth they understand, it can become offensive or weird to some people. However, people are compelled and attracted to truth as well. We are odd as human beings! That being said, it takes some level of fortitude to stand on chiropractic principles and keep teaching the truth about chiropractic despite what people's reactions may be. The reality is at some point you did not understand or know about chiropractic and at some point you embraced it. That means that there are others out there who will do the same. As I always say, you will build a beautiful practice and life if you stand on the values and truth you have had revealed to you.

Practice Tip

Chiropractic birthday party!

September 18 marks the anniversary of the first chiropractic adjustment delivered to Harvey Lillard in Davenport, Iowa. Take the time to celebrate and, of course, educate your practice members about DD Palmer and chiropractic's humble beginnings.

Decorate the office with balloons, post a happy birthday message on your white board, offer light refreshments and most of all - talk about chiropractic.
