Force field

If you watched enough science fiction movies, you would be

familiar with this term. Planets can have a force field and a large spaceship can also have a force field. In physics, it is defined as a field of any type of energy, such as gravitational, magnetic, or electric, that surrounds and affects something. How about creating a force field for chiropractic. Is your practice such that people are drawn into it or are you always complaining about the weather or the economy or that no one really gets chiropractic? How are you affecting your community? Are we being a force for good which attracts people to your cause? Like attracts like. Creating a positive life changing environment and mindset can be a powerful tool in chiropractic practice!

Jay Yuhas, D.C.
GSCS President

When people wonder, “*What's in it for me?*”

Non-therapeutic chiropractic is the most modern form of chiropractic. It is based upon a significantly unique premise, so different from that of the variety of therapeutic segments of the profession that it has been proposed by some that only non-therapeutic chiropractic should be considered chiropractic. That unique premise, briefly stated, is that an individual has a better opportunity to express their optimum potential on all levels and in every aspect of human performance when they are free of vertebral subluxations. The professional objective, then, is to check for vertebral subluxations and effect adjustments when they are found, the purpose being to allow maximum expression of the individual's potential. There is seemingly universal acknowledgement of the soundness of this viewpoint among non-therapeutic chiropractors.

Register now for Convention 2024

Mark your calendars for this year's convention. The GSCS will offer up to 15 hours of CE the weekend of April 13-14, 2024 at the APA Hotel Woodbridge.

The GSCS is excited to announce that Jack Bourla, DC, Anthony DeCosta, DC, Anthony DeMarco, DC, Brian Dooley, DC, Reed Howie, DC, Mary-Ellen Rada, DC and Bruce Steinberg, DC will be presenting at Convention 2024. Two hours of nutrition and two hours of ethics and record keeping will be offered. Each mailing will highlight the topic and biography of one of our speakers.

Convention registration for the chiropractor includes one continuing education certificate, one lunch and one dinner. First year chiropractors, staff and spouse are invited to attend at a discounted rate.

Click [HERE](#) to register.

Click [HERE](#) for a list of approved states as of 3/28/2024. 15 hours have been approved in NJ, including two hours of nutrition and two hours of ethics/record keeping.

Please note: FL, GA, and NY are still pending.

Reggie quote

“Chiropractic holds true that a vertebral subluxation, by its very existence, inhibits the body's ability to fully express its inherent potential. Every vertebral subluxation, by definition includes some alteration of nerve function from perfection to something else. Vertebral subluxation is, at the very least, a change in the body's structure, and every scientist knows that a change in structure must inevitably result in a change in function.

Therefore, all vertebral subluxations must result in altered function. In short, people with vertebral subluxations are better off without them. It does not matter if the subluxated person has a disease or symptom. The presence or absence of disease is irrelevant. EVERY human being, sick or well, newborn or aged, regardless of

nutrition, exercise, occupation, sex, race, religion, and all other factors of life is better off without vertebral subluxation."

Reggie

A new publication by Claude Lessard, DC: The 2027 Chiropractic Textbook

Sometimes, those of us in chiropractic have a tendency to get stuck in the ideas and the philosophy of our forefathers and it hinders the growth and development of our philosophy. It also presents a basis for the criticism that we have developed into some sort of cult/religion. What profession is still using a 1927 textbook as its primary text?

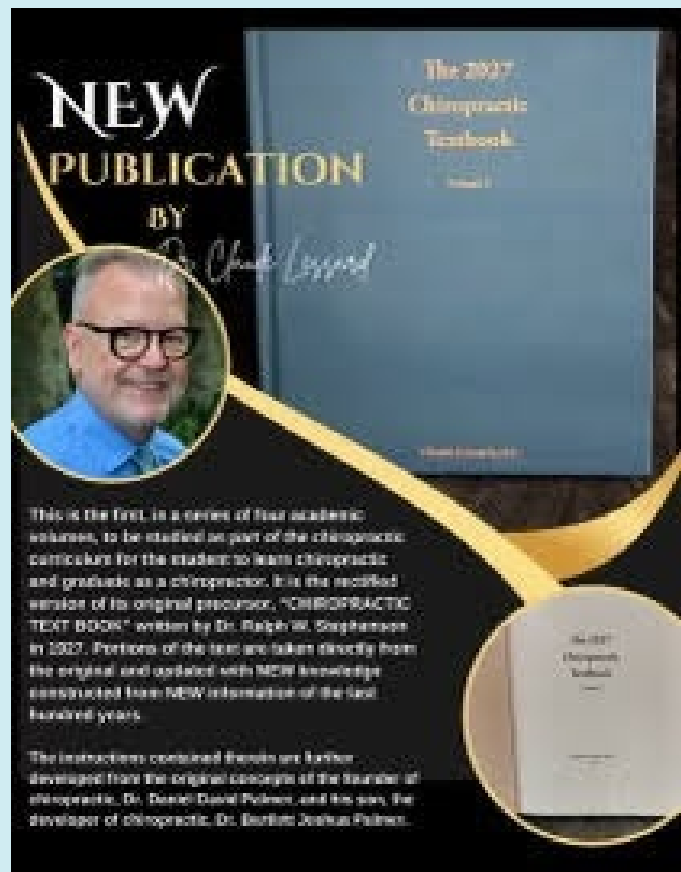

Now for the first time in almost 100 years, The Chiropractic Text Book has been updated and re-

contextualized. **Claude Lessard, DC**, had it suggested to him by Thom Gelardi, DC, to take on the task of rewriting the chiropractic textbook. Claude accepted the challenge and he produced an extraordinary textbook that will encourage future chiropractors to carry on and further develop chiropractic, that will include new knowledge, insights, and error corrections into the third millennium and forever more. I would encourage each of you to pick up a copy of Volume 1 from the **[Joseph B. Strauss Bookstore at Sherman College](#)**, which is ordering Volume 1 of the 2027 Textbook, in bulk, to sell. This an easy way to financially support Sherman so it can make some extra money.

Otherwise, you should be able to find it on any major online book retailer, such as Barnes and Noble or Amazon, by googling the title. Obviously, Sherman wouldn't make money from the proceeds of the book that way.

I present to you part of the preface from The 2027 Chiropractic Textbook Volume 1, by Claude Lessard, D.C.

This is a series of four academic volumes to be studied as part of the chiropractic curriculum for the student to learn chiropractic and graduate as a chiropractor. It is the rectified version of its original precursor, "CHIROPRACTIC TEXT BOOK" written by Dr. Ralph W. Stephenson in 1927. Portions of the text are taken directly from the original and updated with NEW

knowledge constructed from NEW information of the last hundred years. The same building blocks of chiropractic are refashioned into a contemporary context that includes 130 years of continuous discoveries. Credit is given to Dr. D.D. Palmer, Dr. B.J. Palmer, and Dr. R.W. Stephenson. We all stand on their shoulders as we move forward.

These volumes are simply "The Chiropractic Text Book" updated and re-contextualized. The instructions contained therein are further developed from the original concepts of the founder of chiropractic, Dr. Daniel David Palmer, and his son, the developer of chiropractic, Dr. Bartlett Joshua Palmer. Within these volumes, I hope to falsify and deconstruct the theistic and anthropomorphic characters given to some of chiropractic's scientific principles and scientific laws in those early days, namely universal intelligence and innate intelligence. Those chiropractic concepts are then reconstructed on the solid bedrock of the testable and verifiable principles of chiropractic's basic science; they include new information acquired since 1927 that dictates the chiropractic objective. These four volumes contain NEW knowledge that has been discovered and constructed within the past 100 years, NEW information that was unavailable from 1895 to 1927. They cover the philosophy, the science, and the art of chiropractic. They are intended to be a further study of chiropractic, developed to CARRY ON the genius of our predecessors, D.D. and B.J. Palmer; they are designed to convey more precisely "WHAT" chiropractic is, "HOW" to apply its scientific principles, and the hard to vary explanation of "WHY" chiropractic is an evolutionary humanitarian approach to EVERY experience of life, not just the experience of health. These volumes comprise error corrections that are necessary for the student to obtain an assured confidence in the chiropractic objective including its universal value. They honor, yet modernize, this significant discovery and the greater understanding of its necessary and humanitarian service to the world. It was Joseph B. Strauss, D.C. who wrote in 2002, "I do not believe that you can truly understand chiropractic philosophy without studying Stephenson. There are truths within and errors that need to be seen and understood for any student to ever begin to reach a level of comprehension of chiropractic as it was and is today." Students are encouraged to study Stephenson's textbook of 1927, ALL of the Strauss' Blue Books, and the two Blue Books that I have personally authored, A New Look at Chiropractic's Basic Science and Timed Out: Chiropractic.

It is the hope that the truths and error corrections contained within the pages of these volumes will inform and inspire future generations of chiropractors so that they can make an informed choice in constructing their professional mission. Based on these studies, it is clear that the sole aim of the chiropractic objective is the restoration of normal transmission of innate impulses through the location, analysis, and the facilitation of the correction of vertebral subluxations for a normal transmission of innate impulses. PERIOD.

These texts have been written for educational instruction. They are divided into Volume One (First Year Chiropractic Text), Volume Two (Second Year Chiropractic Text), Volume Three (Third Year Chiropractic Text), and Volume

Four (Fourth Year Chiropractic Text). Following the original layout of Stephenson's allowing for the integral comparison of topics. There are questions for review that are intended to help the student THINK and "internalize" the value of chiropractic, and raise inquiry to test any of its 33 scientific principles in order to verify or falsify any of them. The student is urged to become familiar with the unique chiropractic lexicon at the beginning of every volume in order to properly understand the meaning of those terms that will undoubtedly assist the study of the text. Hopefully, these four volumes of the updated chiropractic textbook will encourage future chiropractors to CARRY ON and further develop chiropractic, that will include NEW knowledge, insights, and error corrections into the third millennium and forever more.
